EVICOSCREEN - EVIDENCE BASED COMPREHENSIVE PRENATAL SCREENING REPORT

Patient Name: _____ Patient DOB: _____

Ethnicity: _____ City: _____ Hospital ID: _____

Sample Type: Serum
Collection Date: 11-03-2019

Method: Electrochemiluminescence (Roche)

EVICScreen™ is an evidence based prenatal screening program curated by Lilac Insights in accordance with the Fetal Medicine Foundation (UK) guidelines for First Trimester Screening to determine the probability of most common chromosomal aneuploidies in a pregnancy. It utilizes:

- Hormonal values from the pregnancy measured on Fetal Medicine foundation (UK) accredited analyzers and reagents
- Robust indigenous medians from over 5 lac+ pregnancies for different gestation ages
- Risk calculations from evidence based algorithms validated through large international studies
- External audit of the prenatal screening program by United Kingdom National External Quality Assessment Service (UKNEQAS) scheme and Randox International Quality Assessment Scheme (RIQAS)

Test Name	Result	Units
PLGF	17.30	pg/mL

Note

1. The value mentioned above is observed value for PLGF in the pregnancy on the day of sample collection.
2. These value should not be interpreted in isolation and need to be necessarily incorporated in a validated risk calculation software, along with ultrasound and biophysical parameters to calculate the risk for pre-eclampsia.
